

**REMARKS**

The Examiner and his SPE are again thanked for the many courtesies extended during the personal interviews. The claims are in the condition discussed during the October 2, 2007 interview to place the application in condition for allowance. It is noted that no estoppel as to equivalents is intended or created by this paper, especially as this paper places previously presented claims in independent form without any narrowing. And it is noted that "hydrocarbyl" is supported by the second paragraph under the formula on page 13 of the specification ("hydrocarbyl substituent").

**REQUEST FOR FURTHER INTERVIEW**

If any issue remains as an impediment to allowance, a further interview with the Examiner and his SPE are respectfully requested, and they are respectfully invited to telephonically contact the undersigned to arrange a mutually convenient time and manner therefor.

**CONCLUSION**

In view of the amendments and remarks herewith, the matters discussed during the interviews and the PowerPoint presentations then presented, the application is in condition for allowance. Reconsideration and withdrawal of the rejections of the application, early and favorable reconsideration of the application, and prompt issuance of a Notice of Allowance are respectfully requested.

Respectfully submitted,  
FROMMER LAWRENCE & HAUG LLP
